

Hajrije Berisha

Frontend Developer | React, Next.js, TypeScript

Prishtina, Kosovo | +383 48 140 303 | hajrijeberisha0@gmail.com | linkedin.com/in/hajrije-berisha | github.com/Hajrije3

SUMMARY

Frontend Developer at Gjirafa Inc. building production web applications with React, Next.js and TypeScript, including an e-commerce marketplace, its merchant dashboard, a headless CMS and internal business systems. I take end-to-end ownership of features and codebases, from architecture and data-layer decisions to API integration, authentication, delivery and long-term maintenance.

EXPERIENCE

Frontend Developer, Gjirafa Inc.

2024 - Present

Prishtina, Kosovo | E-commerce, merchant dashboard, headless CMS and internal systems (Finance, WMS, DP, RMS)

- Own the Finance internal tool end to end as its primary maintainer: prioritising fixes, investigating regressions and shipping new features while keeping it stable in daily use.
- Led the migration of the data layer to TanStack Query and Axios, establishing one consistent pattern for caching, loading states, background refetching and error handling.
- Drove the restructure from a flat codebase to a feature-based architecture, grouping components, hooks, services and types by domain to make the app easier to extend and reduce duplication.
- Diagnosed and fixed broken authentication flows, enforcing token handling, protected routes, session persistence and role-based access control across all views.
- Built invoice management, approval workflows, financial reports and validated forms with full REST API integration, plus filterable, sortable, paginated data tables.
- Delivered features from design handoff to release across GjirafaMall, the Sellers Platform and Codex CMS, partnering with backend, design and product teams on shared components and frontend patterns.

PROJECTS

GjirafaMall | E-commerce marketplace | [gjirafamall.com](#)

Built product listing and category pages with filtering, sorting and pagination; product detail pages with image galleries, variant selection and add-to-cart; promotional banners and deals sections.

GjirafaMall Sellers Platform | Merchant dashboard | [sellers.gjirafamall.com](#)

Built product creation and variant management, order listing with status and date filters, and order detail views used daily by marketplace merchants.

Codex | Multi-tenant headless CMS (SaaS) | [docs.codex.gjirafa.tech](#)

Built data tables for managing content entries, an in-app notification centre, and feature screens across content management and settings with role-based access.

AlgoArena | Personal project | [algo-arena-pink.vercel.app](#)

Interactive algorithm visualiser in React for sorting (Bubble, Selection, Insertion, Merge Sort) and pathfinding (BFS, DFS, Dijkstra) with step-by-step playback, scrubbing, speed control and a maze generator.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Framer Motion, Responsive Design, Accessibility

Data and APIs: TanStack Query (React Query), Axios, REST APIs, Authentication, Role-Based Access Control

Backend: Node.js, Express.js, MongoDB, ASP.NET MVC, Razor Pages

Tools: Git, GitHub, Figma, Postman, Vite, Vercel, Microsoft Azure, WebStorm

Practices: Feature-based architecture, Refactoring, Feature ownership, Collaboration, Problem-solving

EDUCATION

BSc in Computer Science and Engineering, UBT - University for Business and Technology

2021 - 2024

Fellow, LIFE from Gjirafa

2023 - 2024
